Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 56-123903 in view of Sakamoto et al..

JP 56-123903 discloses thiazoly ethylanyl phenyl compound for use as a nematocide (See entire document, especially, pg. 19, compound No. 39.

Sakamoto et al. discloses the preparation of thiazole compounds, including 2-(phenylethynyl)-thiazole, 4-(phenylethynyl)-thiazole, 4-methyl-5-(phenylethynyl)-thiazole (Abstract).

The difference between the prior art and the claimed invention is that the prior art does not expressly disclose the use of a toluene sulfonic acid salt or the preparation of a 2-methyl-4(phenylethynyl)1,3-thiazole. However, the prior art discloses the use of thiazoly ethylanyl phenyl compounds and the preparation thereof. As such, one of ordinary skill in the art would expect that any acceptable salt and placement of the methyl and phenylethynyl on any carbone on the thiazole ring would result in a compound which would also be effective in controlling nematocides.

Art Unit: 1616

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.
